No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   This sequence represents the human AMSH gene. The AMSH protein is involved in signal transduction, and interacts with the SH3 domain of cytokine signal transducer STAM. The invention includes human and murin AMSH protein and gene sequences (hAMSH and mAMSH), and also includes antibodies directed against hAMSH and mAMSH. The AMSH protein can be us in the diagnosis and development of drugs for treating diseases due to the dysfunction of cytokine signal transduction e.g. severe infection, cancers and autoimmune disorders
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           Claim 4;
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 of treating disorders.

The SAPs can be expressed by standard recombinant methodology. The SAP proteins and polynucleotides are useful for regulating the cell cycle in a mammalian cell, and for modulating TGF beta superfamily signal transduction in a mammalian cell. SAP polypeptide are useful for testing Smad binding, for testing phosphorylation, for generating antibodies, and as components of an immunoassay. The SAP polynucleotides are useful in gene therapy. The present sequence represents the nucleotide sequence of human SAP1/AMSH that can be used in modulating TGF-beta superfamily signal transduction in a mammalian cell
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    Example 1; Page 53-55;

The AMSH protein is involved in signal transduction, and interacts with the SH3 domain of cytokine signal transducer STAM. The invention includes human and murine AMSH protein and gene sequences (hAMSH and mAMSH), and also includes antibodies directed against hAMSH and mAMSH. The AMSH protein can be used in the diagnosis and development of drugs for treating diseases due to the dysfunction of cytokine signal transduction e.g. severe infection,
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 Sequence 1384 BP; 402 A; 354
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               of treating disorders.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         Protein AMSH being signal transducer interacting with SH3 domain of cytokine signal transducer STAM, for diagnosis and development of cof treating diseases e.g. severe infection, cancers and autoimmune
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   Claim 10; Page 18-19;

The model animals are applicable in screening promoters inhibitors to treat and diagnose diseases in the nervous or immune scaused by deletion of AMSH and/or AMSH-LP. The current sequence represents a human AMSH-LP gene fragment
